The SteelKor X-Stream Wash is the lowest cost, best performing and simplest to operate power-washing system on the market today. The efficiency and reliability of the X-Stream also add up to cost savings for the purchaser. X-Stream Wash Patents / Patent Pending features include the following:

- Tank design minimizes welds for trouble-free, long-life operation.
- Trapezoid tank design allows increased turbulence and impingement without splashing out of the tank for stubborn particle cleaning.
- Opposing water outlets increases exposure to water impingement while improving turbulence.
- Twin pump design increases turbulence by enabling opposing water outlets while minimizing fluid pressure losses due to lengthy, winding plumbing.
- Vacuum-breaker, ribbed intake grate provides efficient flow and prevents pots from sticking to intake.
- Tank design offers superior performance and efficiency that reduces the energy required to heat the water. (The increased turbulence generated by the pump/tank design generates enough heat to raise the water temperature from 58 degrees to 115 degrees in under 90 minutes.)
- Microprocessor control eliminates human error and efficiently regulates cleaning cycles resulting in energy savings.
- Programmable wash schemes and variable speed pumps enable user to maximize performance and efficiency for their particular application.
- Slow speed “idle mode” between wash cycles suspends oil and grease to prevent it from adhering to wash ware as the wash ware is removed.
- Self-diagnostic controller and “plug and play” components provide ease of service resulting in less down time.
- Controller operates in 5 different languages with the ability to produce health code reports.
- NAFEM data protocol ready.
- Removable discharge performance plates provide ease of cleaning.
- Low water detection system provides fail-safe operation in the event of water loss.
- Auto-fill and auto-drain features with “change water” notification.
- System is 100% positive draining.
- Soap and chemical dispersing system automatically and efficiently regulates soap / chemical use and prevents waste.

The wash action of the X-Stream is unmatched in the market. The dual pumps provide greater turbulence and variable speeds; the competitor’s single pump provides less turbulence and single speed. The X-Stream features 22 total water outlets for maximum cleaning; the competitor’s product has only a few outlets. Our angled sidewalls increase turbulence yet decrease splashing; the competitor’s vertical sidewalls allow water and chemicals to splash out. Our multi-sided discharge flow keeps items in constant motion; the competitor’s same-sided outlets provide less flow and may cause water to short cycle or wash ware lockup.

In addition, the intelligent control center on the X-Stream provides consistent results. It allows the customer to program wash schemes tailored to their operation and delivers the right amount of heat, chemical and impingement for each job. The control center also contains a power save “idle mode” for between washes and has the ability to maintain and print out health code reports. Our “plug and play” serviceability means all components can be replaced in 15 minutes or less. Component replacement requires only a nut driver and or wrench, no service call necessary. SteelKor provides comprehensive 3-year parts and labor warranty and will overnight replacement parts.

FEATURES AND COMPARISONS

FEATURES	X-STREAM WASH	POWERSOAK
TRAPEZOID TANK DESIGN	YES	NO
TWIN PUMPS	YES	NO
FULL STAINLESS PUMPS	YES	YES
MICROPROCESSOR CONTROL	YES	NO
PROGRAMMABLE WASH SCHEMES	YES	NO
SLOW SPEED "IDLE MODE"	YES	NO
HEALTH CODE REPORTS	YES	NO
NAFEM DATA PROTOCOL READY	YES	NO
SELF DIAGNOSTICS	YES	NO
5 DIFFERENT LANGUAGES	YES	NO
PLUG AND PLAY CONTROLS	YES	NO
PLUG AND PLAY PUMPS	YES	NO
PLUG AND PLAY HEATER	YES	NO
NON-MECHANICAL, MAINTENANCE-FREE LOW WATER DETECTION SYSTEM	YES	NO
AUTO-FILL & AUTO DRAIN	YES	NO
100% POSITIVE DRAINING	YES	NO
REMOVABLE DISCHARGE PLATES	YES	NO
CHANGE WATER NOTIFICATION	YES	YES
VACUUM BREAKER INTAKE	YES	YES
3 YEAR PARTS AND LABOR WARRANTY	YES	YES
